

Salmon oil

Product information

The salmon oil is cold-pressed from freshly and sustainably caught salmon. This method preserves the essential fatty acids as much as possible. Our salmon oil is also pure and concentrated and is thus not mixed with other oils.

Salmon oil contains omega 3 and omega 6 fatty acids and providing your pet with these extra fatty acids has a positive effect on a variety of bodily functions of your pet. Omega 3 fatty acids keep the blood pressure and cholesterol in check, while omega 6 fatty acids slow down inflammation and take care of your pet's resistance.

What's more, salmon oil improves the digestion, which in turn leads to a better food intake and less stool. The fatty acids also offer extra support to joint functions and add to a healthy skin and a shiny coat.

- Shiny coat and skin
- Better metabolism
- Supports immune system
- Beneficial for heart- and blood vessels
- Enhances appetite
- Supports digestion
- Better joint functions
- Betere gewrichtsfunctie

Ingredients

Oils and fatties (salmon oil 99,55%, of which 47,5% Omega 9, 18,1% Omega 6, 13,9% Omega 3 and natural antioxidant rosemary 0,3%)

Analytical constituents

Crude fat: 99%
Crude ash: <0,1%
Crude fiber: <1,7%
Crude protein: 0,4%

Nutritional value

897 Kcal/100 g. – 3.690 KJ/100 g.

Daily dietary advice

Small dogs: 5ml. (1 tablespoon)
Medium dogs: 10 ml.
Large dogs: 15 ml.

Make sure there is always enough fresh drinking water available.

Usage

Shake before using. One dosage per day per main meal.
